

# FY-2011 BUDGET PROPOSAL

CAMAS COUNTY

**South Central  
Public Health District**  
Prevent. Promote. Protect.

Serving communities in Blaine, Camas, Cassia, Gooding, Jerome, Lincoln, Minidoka, and Twin Falls counties

# PUBLIC HEALTH'S MISSION

TO PREVENT disease, disability, and premature death;  
TO PROMOTE healthy lifestyles; and  
TO PROTECT the health and quality of the environment.

## BOARD OF HEALTH

**Marvin Hempleman**  
Chairman  
Twin Falls County

**Angenie McCleary**  
Blaine County

**Marypat Fields, MS, RN**  
Camas County

**Don Clark**  
Cassia County

**Tom Faulkner**  
Gooding County

**Linda Montgomery**  
Jerome County

**Charles Ritter**  
Lincoln County

**Cheryl Juntunen, MS, RN**  
Minidoka County

**Peter Curran, MD**  
Medical Consultant

**Rene LeBlanc, MS, RS**  
District Director  
Board Secretary

## ADMINISTRATION

Rene LeBlanc, MS, RS

Bonnie Spencer, CPA

Karyn Goodale, MPH

Jeff Pierson, MCP

District Director

Deputy Director

Public Information Officer

Management Assistant

Family and Children's Health Division Director

Environmental Health Division Director

Public Health Promotion and Preparedness Programs Director

IT Resource Manager

# SOUTH CENTRAL PUBLIC HEALTH DISTRICT

Calendar year 2009 was a very busy year for South Central Public Health District (SCPHD). The Idaho Public Health Districts introduced one piece of legislation for the First Regular Session of the Sixtieth Legislature. This piece of legislation recommended a change to food permit fees charged based upon type of establishment and relative health risk category. It was approved and became law on July 1, 2009.

Other legislation of significance to the public health districts was Idaho Department of Health and Welfare's (IDHW) proposed changes to Daycare Licensing and the Idaho Child Care Program (ICCP). Under the new rule, daycares and ICCP are combined into one program for regulation. IDHW will still contract with the public health districts for inspections. The actual number of daycare operations has decreased over the last few years due to more stringent requirements for training and background checks; however, this trend is expected to reverse gradually as operators become used to the new code and rules.

The summer brought the transition in the management of the Childhood Immunization program from Universal-Select to Vaccine for Children (VFC-only). This was a budgetary reduction decision by IDHW due to reduced funding for FY-2010. This required SCPHD to purchase vaccines for all children not eligible for VFC (on Medicaid, under/un-insured, Native American, and native Alaskan). We required those families not eligible for VFC to pay up front for childhood immunizations with the exception of Blue Cross of Idaho and Blue Shield clients. This was a significant change to an established business practice and required extensive community relations and education. After significant outcry from non-VFC families, temporary funding was identified and the program transitioned back to Universal-Select by August 2009.

In August, the public health districts secured a contract with the Consumer Product Safety Council (CPSC) to inspect swimming pools for compliance with the Virginia Graham Baker Act. This is federal legislation requiring pool drains be constructed in such a way as to make body entrapment impossible. SCPHD conducted 51 inspections over a 120 day period to meet the requirements of this contract.

At the start of FY-2010, SCPHD received several new Health Promotion contracts which included funds to promote skin-cancer prevention through the "No Sun for Baby" program; funding to reduce teenage pregnancy by implementing a school-based, comprehensive adolescent pregnancy prevention curriculum in area schools; and additional funds to promote physical activity and healthy nutrition for elementary school aged children. Conversely, due to funding constraints, Millennium funding (tobacco cessation) was decreased by nearly 50% over the previous year; and the Idaho Asthma Control and Prevention Program was eliminated.

SCPHD tackled a few facility projects in calendar year 2009. The biggest project was to begin construction of our new Gooding facility in September. Rough-in work on the 3,428-sq. ft. building was completed by the end of the year, with brickwork, landscaping, signage, and finish interior work pending. The new office opened to client services in March 2010.

There was one change to our Board of Health with the resignation of Don Billings, Minidoka County, due to health reasons. Cheryl Juntunen was appointed by the Minidoka Board of County Commissioners to replace Mr. Billings in December 2009.

# 2009 H1N1 INFLUENZA

During the spring, the first of two epidemic waves of H1N1 occurred in the United States. Although we weren't affected last spring in Idaho, this virus did become pandemic (worldwide transmission) and resulted in the distribution of the Strategic National Stockpile (SNS) for antiviral medications to the state of Idaho and the public health districts.

In the early fall, the second wave of H1N1 began spreading across the United States starting on the east coast and moving westward. In Idaho, the height of the outbreak occurred in November. In order to mitigate the epidemic/pandemic, the U. S. Department of Health and Human Services authorized the distribution of SNS personal protective equipment (PPE) in the same fashion as the antiviral stocks. We received and currently store PPE in the district.

A total of 152 cases of H1N1 were reported during 2009. The following are counts by county:

Blaine	14	Camas	0	Cassia	18
Gooding	11	Jerome	33	Lincoln	1
Minidoka	29	Twin Falls	46		

SCPHD directed its efforts to reduce the impact and spread of H1N1 throughout south central Idaho by suspending non-essential public health services. Staff were then assigned to duties to accelerate public health preparedness and response functions, specifically those related to our mass vaccination planning efforts, such as:

- Activating vaccination plans to establish location, staffing, and other critical items to support community-based clinics.
- Engaging community partners to support vaccination clinic functions.
- Receiving, inventorying, dispensing, and storing medication and supplies.
- Strengthening the district's workforce by identifying, recruiting, and training temporary helpers.
- Establishing a mass media risk-prevention campaign.
- Providing accurate and "real-time" formation utilizing the district phone bank, website ([www.phd5.idaho.gov](http://www.phd5.idaho.gov)), live interviews, and community presentations.

With dedicated, federal Public Health Emergency Response (PHER) funds, SCPHD was able to purchase response items (trailers, communication devices, and vaccine storage and monitoring equipment) and hire temporary staff to help support clinic related functions. SCPHD was also able to make several infrastructure improvements in support of the mass vaccination effort:

- HVAC upgrade and installation of emergency generator (with uninterruptable power supply) to protect the Twin Falls facility data center and pharmacy.
- Implementation of video conferencing to support emergency response planning.
- Implementation of mobile computing equipment and capacities for clinical operations.
- Phone system upgrades to strengthen communication capacities.

# 2009 H1N1 INFLUENZA, CONT.

All of these efforts were highly successful in three ways:

1. Between October and December, nearly 16,000 school-age children (and their family members) were vaccinated in 23 school-based vaccine clinics through a unique partnership with the Region IV School Superintendents' Association.
2. Vaccine was allocated to 36 health care providers and 10 nursing homes and pharmacies throughout south central Idaho to administer to their most at-risk clients (such as pregnant women and people with chronic health disorders). Over 10,000 doses of vaccine were distributed to private providers for their patients.
3. We conducted 67 in-house H1N1 vaccine clinics in offices throughout the district. In-house clinics were initially for high-risk clients; but as the vaccine supply increased, they were then open to the general population. By thoughtful planning and a unified response, SCPHD performed the necessary functions to reduce the spread of influenza in south central Idaho.

# SOUTH CENTRAL PUBLIC HEALTH DISTRICT FY-2011 BUDGET PROPOSAL

	APPROVED FY-2010 BUDGET	REVISED FY-2010 BUDGET	PROPOSED FY-2011 BUDGET
<b>ESTIMATED EXPENDITURES</b>			
BY CLASSIFICATION			
Personnel costs	\$4,821,895	\$4,866,701	\$4,724,831
