

South Central Idaho Women's Health Providers

Family planning services, provided by South Central Public Health District (SCPHD), will be discontinued on 9/30/14. Family planning services will become available from another provider in your area. The Idaho Department of Health and Welfare is working with federal partners who provide the grant funding for the family planning services to find a solution to continue services in south central Idaho. The Department of Health and Welfare will provide further information as a resolution develops. During the interim, families needing services should contact their local healthcare provider to discuss possible options. The following are local providers of women's health services. If you have insurance coverage, make sure you review your benefits. You may find that preventive services, including birth control, may be a covered benefit. SCPHD encourages you to find a provider that will meet your reproductive needs as well as all of your healthcare needs. This list is intended as a general resource. It may not include every local provider. Please call your local hospital for a complete list of local providers.
