SCPHD Teams Up With Local Hospitals and Emergency Services to Discuss Emergency Preparedness

TWIN FALLS –On February 11, South Central Public Health District (SCPHD) along with local hospitals and emergency services will participate in a discussion-based exercise on emergency preparedness. This group exercise will focus on healthcare system preparedness, emergency operations coordination, volunteer and fatality management, and information sharing. The exercise is designed to test medical and emergency plans while enhancing multi-agency coordination.

SCPHD and other agencies will use feedback and lessons learned and apply them to an in-depth, multi-county exercise to be held in April.
