

Head Lice

To eliminate head lice:

1. Shampoo with a lice killing product
2. Comb with a special lice comb
3. Treat your house and surroundings

Head lice are not a hygiene problem or the result of a dirty house. Anyone can get head lice.

Lice are not able to fly or hop, but they can crawl from head to head when people are in close contact.

Lice require blood to live. Off the scalp, head lice rarely survive beyond two days.

Pets cannot get or spread human head lice.
