

**SHARED WELL WATER
SYSTEM CHECKLIST**

Subdivision Name: _____ **Date:** _____

Checklist: The checklist contains the items required to be submitted before a plat proposing use of a shared well(s) (not classified as a public water system per IDAPA 58.01.08) supplying water to those lots can be approved and signed.

	Item	Y/N	District Use
1	Provide water right(s) documentation from the Idaho Department of Water Resources (Idaho Code 42-201; 42-229).		
2	Provide certification that there is sufficient contributed capital available to allow the shared well water system to be constructed and provide water service without further connection charges or fees to the landowners of the lots, except for connection of laterals, meters, or other equipment exclusively for the lot owner's own use (I.C. 50-1334(c)).		
3	Provide documentation and analysis of the proposed shared well water system meeting the Well Construction Standards Rules (IDAPA 37.03.09): Including Source production capacities (IDAPA 37.03.09.025.01.c) and linear distances between well(s) and features of concern including subsurface disposal system(s) identified in the following rules: IDAPA 37.03.09 and IDAPA 58.01.03.		
4	Distribution system pipe sizes will be indicated as meeting good engineering practices.		
5	Linear and elevation differences between connections, storage, and source will be indicated.		
6	The face of the mylar plat will contain appropriate certificate of approval and owner certification of water supply.		
7	A hard copy of signed plat will be provided to Health District.		
8	A hard copy of a Shared Well Agreement will be provided to the Health District.
