

BEFORE YOU BUY LAND TO BUILD A HOUSE

ASK A FEW QUESTIONS:

1

Can I hook up to city sewer and water here?

2

If I need a septic system/well, can I legally install one here?

3

If I need a septic system/well, will it do well in this kind of soil or rock? Or will I have to replace it after a few years?

4

Are there any other public health, city, or county requirements I will have to meet before I can start building?
