

## WHAT TO KNOW ABOUT SCPHD'S COVID-19 RISK LEVELS:

- The risk levels may be applied at the county level.
- **Different counties within SCPHD may be at different risk levels.** Risk levels can increase or decrease.
- In ALL risk levels, the preventive measures outlined in the Minimal Risk Level should be followed. *Always prepare for the next risk level.*
- In addition to metrics determining risk of transmission, public health officials will closely monitor and may take into consideration for movement to a different risk level the following:
  - Input from hospital partners – local hospital capacity is determined by each hospital in the region
  - Trends in COVID-19 testing, including positivity rate
  - Supplies of Personal Protective Equipment (PPE) for healthcare providers/first responders
  - Epidemiological investigation and contact tracing capacity, including outbreaks associated with congregate living facilities
  - COVID-related hospitalizations and deaths
  - Syndromic surveillance of emergency department visits with COVID-like symptoms

**COVID-19 HOTLINE • 208-737-1138 • [www.phd5.idaho.gov](http://www.phd5.idaho.gov)**

Last risk assessment: 6/16/2022

# Metric Definitions

and weight  
for each metric

## Positivity Rate for the County

Data is provided by Idaho Health and Welfare. This category is used mostly for context and has the least weight in the final assessment.

## Average New Cases Per 10,000 residents.

This category reflects the trending case number on a rolling 14 day average. It indicates public health's ability to keep up with investigation and contact tracing for new cases. This category has less weight than hospital capacity and more weight than the positivity rate.

## Hospital Capacity

Hospital Capacity includes the local healthcare facility's ability to treat all incoming patients, not just COVID -19 positive patients. This category has the most weight in the decision making for the final assessment.

Hospital capacity includes available staffing, available beds, available personal protective equipment, and other factors that may impact their ability to respond to medical emergencies. The final assigned capacity is determined by the local hospital in each county.

## Other Epidemiological Factors

These factors indicate public health risk. These may include SIGNIFICANT outbreaks (outbreaks that are not controlled) in healthcare centers, schools, congregate living facilities, etc. They may also include case surges that overwhelm investigation efforts.

If SCPHD identifies any concerning factors, this category will have similar weight to the hospital capacity level.

**South Central Public Health District**

Using data from July 3rd to 16th

# Blaine County

Risk level: Moderate

Blaine County's positivity rate is in the critical risk category. The case rate is in the high risk level. At-home tests are not recorded in this data. It is possible the case rate is higher than data shows.

As cases increase, the overall impact to local healthcare is moderate.

Taking all major factors into account, the overall determined risk level is moderate.

**South Central Public Health District**

HOSPITAL CAPACITY FOR CARE IS IMPACTED (MEDICAL SURGE CAPACITY STILL AVAILABLE)</li> </ol>	<p>AT THE MODERATE LEVEL, THERE MAY BE SPORADIC CASES, AN UPTICK IN CLOSE CONTACT TRANSMISSION, OR ISOLATED CLUSTER OUTBREAKS. SCPHD <u>OR</u> LOCAL JURISDICTIONS MAY INSTITUTE SOME OR ALL OF THE FOLLOWING:</p> <ul style="list-style-type: none"> <li>• Increase education, information sharing and warning, and messaging (health advisories), continue to emphasize vaccinations</li> <li>• Extra precautions for vulnerable populations (older adults, individuals with underlying health conditions)</li> <li>• Stricter policies for staff and visitors to avoid potential outbreaks in congregate living facilities (long-term care, nursing homes, correctional facilities, etc.)</li> <li>• Follow state, public health district, and/or local medical guidance for limitations on gatherings and mask requirements</li> <li>• If unvaccinated, maintain physical distance of at least 6 feet from others (outside of immediate family) whenever possible – avoid crowds and poorly ventilated indoor spaces</li> <li>• If unvaccinated, wear face coverings in public that fully cover the nose and mouth when physical distancing is not possible or is difficult to maintain</li> </ul>

# Camas County

Risk level: Minimal

Camas County's case rate has jumped into the moderate risk level, but the positivity rate remains minimal. (The case rate considers a rolling 14 day average, but the positivity rate only reflect cases in the last calendar week.)

The overall impact on hospitals in the area is minimal.

Taking all major factors into account, the overall determined risk level is minimal.

**South Central Public Health District**

1.99

Average New Cases Per 10,000 residents  
based on a **14 day rolling average.**

**Minimal**

## No Specific Hospital

Hospital Capacity includes the local healthcare facility's ability to treat all incoming patients, not just COVID -19 positive patients.

**Minimal**

## Other Epidemiological Factors

Minimal impact to community. Investigations and contact tracing have been suspended.

**RISK LEVEL****METRICS MONITORED****MITIGATION STRATEGIES****MINIMAL**

1. NEW DAILY CASES <1 PER 10,000 POPULATION (14 DAY ROLLING AVERAGE)
2. COVID-19 TESTING POSITIVE RATE <5%
3. HOSPITAL CAPACITY FOR CARE IS NORMAL

At the minimal level, the risk of community-wide COVID-19 spread is lower.

**REGARDLESS OF THE RISK LEVEL THROUGHOUT THE PANDEMIC, EVERYONE IS ENCOURAGED TO DO THE FOLLOWING:**

- Stay home if you are sick
- Get vaccinated
- If unvaccinated, maintain physical distance of at least 6 feet from others (outside of immediate family) whenever possible
- If unvaccinated, avoid crowds and poorly ventilated indoor spaces
- If unvaccinated, wear a mask in public (especially indoors) that fully cover the nose and mouth when physical distancing is not possible or is difficult to maintain
- Wash hands frequently for at least 20 seconds or use hand sanitizer if soap and water aren't available
- Vulnerable populations (older adults, individuals with underlying health conditions) take extra precautions
- Carefully monitor your health – be alert for symptoms

**MINIMAL  
RISK**

# Cassia County

Risk level: Minimal

Cassia County's positivity rate and case rate continue in the minimal risk level.

The overall impact on hospitals in the area is also minimal.

Taking all major factors into account, the overall determined risk level is minimal.

**South Central Public Health District**

**MINIMAL  
RISK**

# Gooding County

Risk level: Moderate

Gooding County's positivity rate has jumped into high risk. The county case rate is also trending upward and is now in the moderate risk level.

The overall impact on hospitals in the area is moderate because of capacity.

Despite the positivity rate and hospital impact, COVID-19 impact in the community remains low. Taking all major factors into account, the overall determined risk level is moderate.

**South Central Public Health District**

# Jerome County

Risk level: Moderate

Jerome County's positivity rate and case rate are in the low end of the high risk level.

The overall impact on hospitals in the area is minimal.

Despite the positivity rate and case rate, COVID-19 impact in the community remains relatively low. Taking all major factors into account, the overall determined risk level is moderate.

4.22

Average New Cases Per 10,000 residents  
based on a **14 day rolling average.**

**Moderate**

## Hospital Capacity

The impact on the local and regional hospital is in the moderate category because of staffing and capacity.

**Minimal**

## Other Epidemiological Factors

Minimal impact to community. Investigations and contact tracing have been suspended.

**RISK LEVEL****METRICS MONITORED****MITIGATION STRATEGIES****MODERATE**

1. NEW DAILY CASES IS BETWEEN 1 to 2.5 PER 10,000 POPULATION (14 DAY ROLLING AVERAGE)
  2. COVID-19 TESTING POSITIVE RATE IS BETWEEN 5% to 10%
- OR
3. HOSPITAL CAPACITY FOR CARE IS IMPACTED (MEDICAL SURGE CAPACITY STILL AVAILABLE)

AT THE MODERATE LEVEL, THERE MAY BE SPORADIC CASES, AN UPTICK IN CLOSE CONTACT TRANSMISSION, OR ISOLATED CLUSTER OUTBREAKS. SCPHD OR LOCAL JURISDICTIONS MAY INSTITUTE SOME OR ALL OF THE FOLLOWING:

- Increase education, information sharing and warning, and messaging (health advisories), continue to emphasize vaccinations
- Extra precautions for vulnerable populations (older adults, individuals with underlying health conditions)
- Stricter policies for staff and visitors to avoid potential outbreaks in congregate living facilities (long-term care, nursing homes, correctional facilities, etc.)
- Follow state, public health district, and/or local medical guidance for limitations on gatherings and mask requirements
- If unvaccinated, maintain physical distance of at least 6 feet from others (outside of immediate family) whenever possible – avoid crowds and poorly ventilated indoor spaces
- If unvaccinated, wear face coverings in public that fully cover the nose and mouth when physical distancing is not possible or is difficult to maintain

**MODERATE  
RISK**

## Crosswalk for Schools

[Idaho Back to School Framework](#) has identified three categories for determining transmission risk (table below). To assist schools located in the six-county region, South Central Public Health District has crosswalked the Idaho Back to School Framework with the COVID-19 Risk Level advisory system.

<b>"Identify Level of Transmission Risk"</b>			
	<b>Category 1: No Community Transmission</b>	<b>Category 2: Minimal to Moderate Community Transmission</b>	<b>Category 3: Substantial Community Transmission</b>
<b>Definitions</b>	Evidence of isolated cases, case investigations underway, no evidence of exposure in large communal setting, e.g., healthcare facility, school, mass gathering.	Widespread and/or sustained transmission with high likelihood or confirmed exposure within communal settings, with potential for rapid increase in suspected cases.	Large-scale community transmission, healthcare staffing significantly impacted, multiple cases within communal settings like healthcare facilities, schools, mass gatherings, etc.
<b>Level of Operations</b>	School buildings open with physical distancing and sanitation.	School buildings open but option of limited/staggered use of school buildings with physical distancing and sanitation.	Targeted, short-term, or extended building closure.

COVID-19

**ORANGE**

COVID-19  
RISK LEVEL  
**RED**

## DEFINITIONS

### CRISIS STANDARDS OF CARE:

Guidance to help guide ethical decision-making for how to triage medical care when it has to be rationed.

Plan can be found on the [Idaho Department of Health and Welfare's website](#).

### MEDICAL SURGE CAPACITY:

Medical surge capacity refers to the ability to evaluate and care for a markedly increased volume of patients—one that challenges or exceeds normal operating capacity. The surge requirements may extend beyond direct patient care to include such tasks as extensive laboratory studies or epidemiological investigations.

[Source](#)

## TIMELINE FOR MEASUREMENTS

Data to support the corresponding Health Risk Level and any related mitigation strategies will be posted every other Thursday by 5 pm.

Health Risk Levels will be made on every other Thursday based on the prior two weeks starting on a Sunday and ending on a Saturday. Movement from one risk level to a lesser risk level will occur at 14-day intervals (one incubation period for COVID-19), while advancement to a level of higher risk can occur at any time.

## MOVEMENT BETWEEN RISK LEVELS

Determinations to move to a more restrictive risk level may be made mid-stage if any of the criteria below are met:

- Crisis standards of care are implemented
- Counties must remain in a risk level for at least two weeks before moving to a less restrictive phase
- Senior leadership at a local hospital indicates that further increases in cases in the community will overwhelm local hospital capacity
- Reported cases exceed > 5 **daily new cases** per 10,000 people in a defined population (e.g., town, city, or county) or if new case rate adversely impacts SCPHD's ability to respond
